

Get more oxygen for **less** money

> fight back against the growing power bills with the new technology in paddle aeration.

Team Aqua Paddle Wheel

> Full impeller dia.: 68cm,
Blade: 26cm (L) x 17cm (H)
x 5cm (W)

> Water is broken into two directions and splashed high up to the air by the wide parabola

New \$\$\$ Saving Technology

- Higher speed for more efficient oxygen transfer
- Higher and wider splash pattern
- Smaller droplets, more surface area for better oxygen transfer
- 50% plus more water displacement for same power consumption
- Less power consumption for the same O2 output or same power consumption for more O2 output
- Adjustable impellor with patented parabolic design
- Synthetic aluminium magnesium motor which dissipates heat 30% quicker than cast-iron motors, thus longer life and more efficient
- Motor is much lighter, thus easier lifting and cartage of paddwheel
- Longer life of gearbox due to 3 teeth engaged between worm and wheel drive as opposed to the conventional 2 teeth in other paddwheels
- Floats and motor cover are made from HDPE - longer life and more durable
- 12 month warranty
