

How to clean a BubbleTECH diffuser?

**Our diffusers
require next to
no maintenance.
All you need to
do is to follow 3
simple steps!**

1. Brush the diffuser

At the beginning, use a brush to get rid of algae and any kind of dirt accumulated on the outside of the diffuser.

2. Crank up the pressure

Use the pressure level above the recommended value. Do not worry, you will not cause any damage.

3. Stretch!

Simply stretch the diffuser to loosen dirt accumulated in the perforations. Water will do the rest.
